Impossibly beautiful and mysterious, Svaneti is an ancient land, locked in the Great Caucasus Mountains. The population is mostly Svans, a cultural and linguistic subgroup of the Georgians. We'll enjoy lunch in one of the charming, simple, local cafes before returning to Mestia.

On the way we'll notice many old, traditional villages. One more interesting fact about Svaneti, connects it to Jason and the Argonauts' mythic quest for the Golden Fleece which, scientists say, took inspiration from an actual voyage sometime between 3,300 and 3,500 years ago. Jason went from Greece to a kingdom near the Black Sea renowned for using sheepskins to collect gold grains and flakes from mountain streams.

Mountain streams in the Svaneti region of Georgia carry bits of gold and gold-specked gravel that erode out of bordering rock formations. Even nowadays local villagers put sheepskins in these streams to catch floating gold, a technique that goes back thousands of years - suggesting that the region is the province of the ancient Colchis Kingdom.
